

This International Standard gives requirements for the classification and testing of rubbers used to seal solar energy collectors in order to aid selection for specific applications. The design requirements in this International Standard pertain only to permissible deflection of the rubber during thermal expansion or retraction of the seal in use and to the tolerances on dimensions of moulded and extruded seals. This International Standard does not include requirements pertaining to geometrical design, fabrication or installation of the seals. This International Standard is applicable in conjunction with long-term ageing and weathering tests. However, if long-term tests are performed, it is recommended that ISO 4892-2 be complied with for ageing tests and ISO 877 for accelerated weathering tests and material exposure tests, respectively.

Finally we got the ISO 9553:1997, Solar energy - Methods of testing preformed rubber seals and sealing compounds used in collectors file. Thank you to Adam Ramirez who share me a downloadable file of ISO 9553:1997, Solar energy - Methods of testing preformed rubber seals

and sealing compounds used in collectors for free. we know many reader find this book, so I want to share to every readers of our site. Well, stop to find to other blog, only in nomadworldcopa.com you will get copy of pdf ISO 9553:1997, Solar energy - Methods of testing preformed rubber seals and sealing compounds used in collectors for full version. Visitor should contact us if you got problem on downloading ISO 9553:1997, Solar energy - Methods of testing preformed rubber seals and sealing compounds used in collectors book, visitor can telegram us for more information.
